

// PEDESTRIAN COUNTS

Pedestrian counts were held on the third Thursday and fourth Friday of September in 2012 and 2013 at the Fifth Third Pavilion at Cheapside Park and in 2013 at the Central Library downtown. The following graphs illustrate the counts taken during those times. During both years the weather was warm and sunny. The positive impact of having evening outdoor entertainment such as Thursday Night Live is evident with the high count of 2,500 pedestrians from 7 to 9 pm. The Thursday evening counts yielded twice as many pedestrian compared to morning pedestrian counts and for the same time period on a Friday evening.
